

INSTRUCTION OF REFILLING CARTRIDGES FOR THE PRINTER EPSON 11880

What you need:

- Refillable cartridge
- Used Epson cartridge (it needs to contain at least 15% of ink) the same colour as refillable cartridge
- Solution ink in bottle
- funnel
- Syringe and priming tip
- Chip resetter for the refillable cartridge
- A small flathead screwdriver (to pull the chip with the plastic nest from the refillable cartridge)
- knife

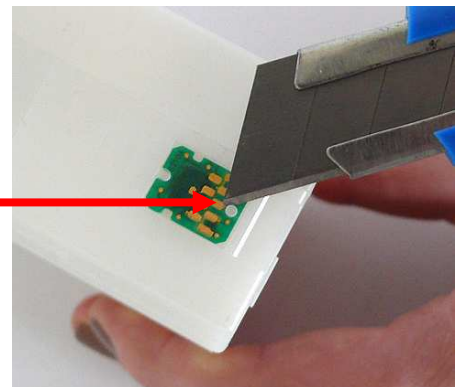

ATTENTION! It is very important that original chip shows at least 15% of ink (cartridge should not be empty).

The chips contain information about the ink colour, this is why the chip removed from the original Epson cartridge for example cyan must be installed in the same colour refillable cartridge.

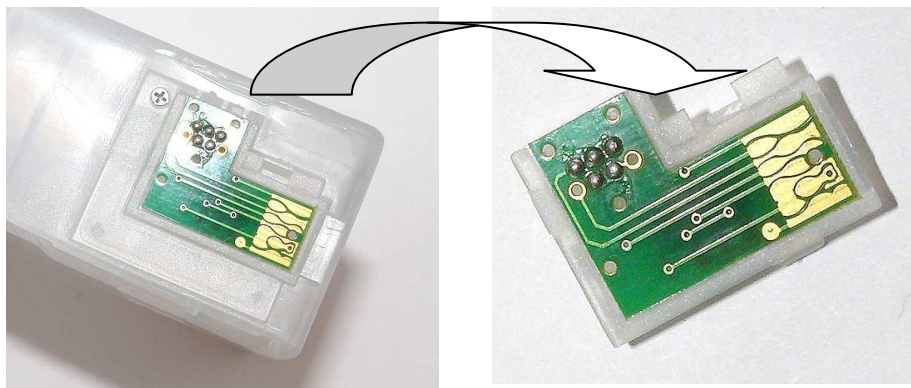

Remove the chip from the original Epson cartridge.

Using a blade, very carefully cut the rivet and remove the chip.

rivet

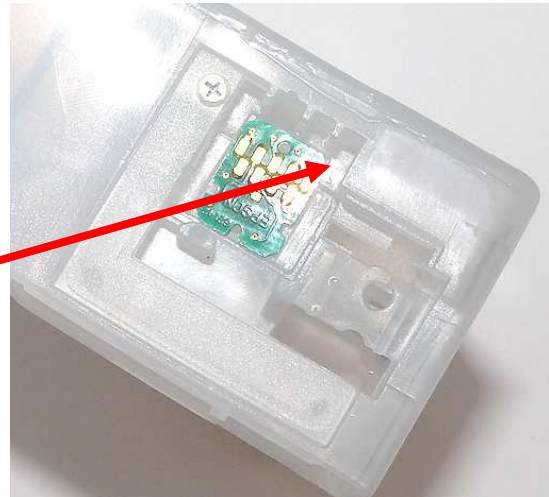

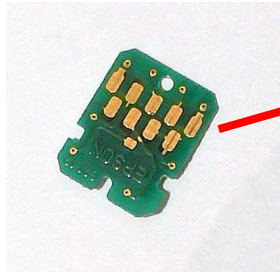

- 1. Remove the plastic nest which holds chip, together with chip from the refillable cartridge** (using a small flathead screwdriver you need to lever the nest/plastic part which hold the chip)

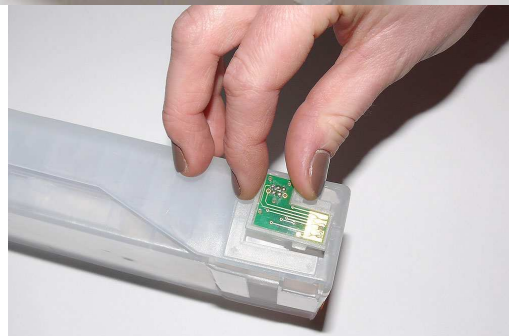

2. Put the original chip on the refillable cartridge.

Put the original chip, you need to fit it under the protruding pin which you can find in the cavity

3. Install the chip holder/nest back on the refillable cartridge (over the original chip).

4. Reset the chip with a help of chip resetter by holding it the same as it shown in the picture. Keep it like this until the red flashing light will turn into green and then turns off.

Refilling carts with ink

1. Remove the white plug from the hole for ink refilling.

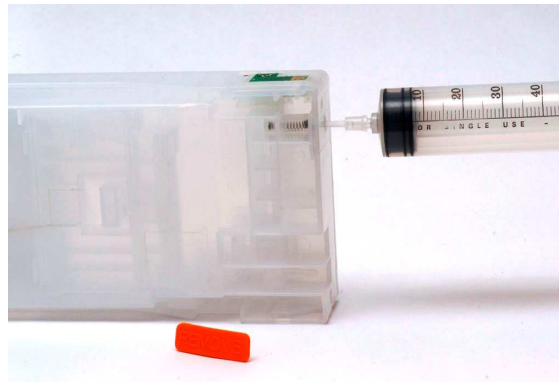

2. With a help of funnel, pour the ink very slowly but not fully. Leave around 1cm of empty space.

Leaving around 1 cm of empty space

3. Put on the white plug back and remove the orange safety plug.
4. Vent the cartridge with a help of syringe with priming tip until a few drops of ink enter the syringe.

The cartridge is ready to print!
